

Peace of Mind Protection (PoMPRO)

The Winquest Peace of Mind Protection (PoMPRO) Service is a cost-effective way to reduce your cybersecurity risk while also preparing yourself in case you are breached. Full program details below. The PoMPRO package is available as an affordable monthly subscription or a discounted annual subscription.

Trusted Advisor

Your Trusted Advisor will help you learn about important proactive security measures, prevent and prepare for a cyber incident, or respond if one occurs.

What you can expect:

- PoMPRO clients can expect a monthly call from their Trusted Advisor, in which their Advisor will share about proactive security measures and listen to client questions and concerns.
- If more technical insight is needed, the Trusted Advisor will follow-up with the full Winquest technical team to research an answer and set up a follow-up call if necessary.

What you need to do:

- Schedule your monthly touch-base call
- Reach out whenever you have questions

Incident Response

PoMPRO clients receive priority IR support over non-retainer clients, and a discount on Incident Response rates. We also get important logistics in place before a crisis occurs, allowing the IR team to be both nimble and effective in their response.

What you can expect:

- Locked in rate of \$275/hr for 20 hours of initial response. Additional support billed at \$275-\$350/hr depending on the scope of the incident.
***Current market rates for incident response can exceed \$400 an hour, per responder!!*
- If an incident does occur, Winquest will have our IR team assembled and responding within 30 minutes of your initial phone call.

What you need to do:

- Complete the Pre-IR Questionnaire
- Sign an SOW pre-authorizing up to 20 hours of initial response
- **In the event of an Incident, contact Ryan Stevenson at 240-444-6380**

Discounted Employee Training

Trained employees are your greatest defense against an incident. Winquest helps your employees avoid phishing scams and be on the lookout for suspicious activity.

What you can expect:

- Training for \$21/seat – 10% off retail price

What you need to do:

- Provide a list of employees in scope – names and email addresses
- Provide a technical POC to help whitelist the testing domain
*** This ensures training messages test your end users, rather than test your email filters.*

Discounted Data Back-up Services

Data back-up is the most important way to reduce the cost of an incident, by allowing you to hit the reset button and return to work. Winquest is partnered with a leading provider to help you avoid a costly ransom, minimize downtime, and get back to business faster.

What you can expect:

- 10% discount on data back-up solutions

What you need to do:

- Contact Ryan Stevenson 240-444-6380 or ryan.stevenson@winquestengineering.com to begin scoping and designing a solution customized to your business needs

Complimentary Annual Service [Annual Agreement Only]

Winquest provides a Cybersecurity Abbreviated Vulnerability Assessment (CAVA™) free-of-charge for annual agreement holders who remain incident-free during their agreement period. This service reduces your risk of a future incident and is scheduled after month 10 of your annual agreement.

Cybersecurity Abbreviated Vulnerability Assessment (CAVA™)

The CAVA™ is an abbreviated version of our full assessment designed to make it affordable to proactively protect your business with a low-cost, one-day cybersecurity assessment. Valued at \$3,950, this service will identify weaknesses in your network and operating system infrastructure and give you detailed recommendations to eliminate your most dangerous vulnerabilities. Often your existing IT support team can follow through with the improvements once we make specific recommendations. Winquest can also be contracted to implement these changes.

What you can expect:

- A communication from your Trusted Advisor in month 10 of your annual agreement to schedule your complimentary CAVA™
- Winquest will conduct an assessment on the agreed-upon Client network infrastructure, using a cadre of commercial, custom, and open-source toolsets, and leveraging Winquest's industry experience and knowledge of the latest cybersecurity trends to:
 - Search for security vulnerabilities in your network, operating systems, and devices
 - Provide valuable information on vulnerabilities found in your network, helping to improve your network security posture
 - Provide specific recommendations to resolve dangerous vulnerabilities discovered during the assessment

What you need to do:

- Nothing! If you remain incident-free, this service is Winquest's gift to you. (A \$3,950 savings!)

In lieu of a CAVA™, clients may choose to receive one of the services listed below. For more information, please contact Ryan Stevenson at 240-444-6380 or ryan.stevenson@winquestengineering.com.

- Policy and Procedure review
- IR table-top exercise or full rehearsal
- Additional Cybersecurity Training

Beginning Service

The PoMPRO package is available as an affordable monthly subscription or a discounted annual subscription. For more information, or to begin your subscription, please contact Ryan Stevenson at 240-444-6380 or ryan.stevenson@winquestengineering.com.

Monthly Subscription	\$499.00/month	Annual Subscription	\$5,500/year
